Branch Value Added

Branch Sales Value Added (Indexed)

Same Store Sales are compared by computing the NPV of new product sales / incremental balances in existing accounts basis historical trends. These are compared over time. It may be noted that the value addition imputed in this process assumes the behaviour of new accounts would mimic historical trends. Therefore, this process is inherently inexact and comparison over time may not be entirely appropriate. This inherent limitation must be kept in mind while analyzing the data contained above. The above figures are rebased to 100 as on Q4 FY24.
